Generate Job Fit Analysis for ai engineer at infosys

Match Percentage: 75%

The resume matches the AI Engineer role at Infosys in several aspects:

- Relevant education: The candidate has a B.Tech in Computer Science (Artificial Intelligence) and a Diploma in Electronics & Communication Engineering, making them a strong candidate for the AI Engineer role.
- Technical skills: The candidate has listed relevant technical skills such as Python, C++, Machine Learning, Computer Vision, NumPy, Pandas, and OpenCV, which are essential for the AI Engineer role.
- Experience: The candidate has experience in AI and data science, including working with Python and R, performing EDA, and developing analytical reasoning.

However, there are some missing keywords and areas that could be improved:

Missing Keywords:

- Cloud computing: While the candidate has experience with AI and data science, they may want to emphasize their familiarity with cloud computing, which is a key aspect of the AI Engineer role at Infosys.
- Deep learning: The candidate could highlight their experience with deep learning, as this is a critical area of focus for the AI Engineer role.
- Full-stack development: The candidate could emphasize their experience with full-stack development, as this is an essential skill for the AI Engineer role.
